

**With your Inquiry**

When making your inquiry, please let us know the following information  
So we can propose the best suitable system for you.

<b>①Web(Base material)</b>	
Type (Material)	
Shape	
Wound diameter	mm
Web width	mm
Thickness	mm
Base Weight	g/m <sup>2</sup>
<b>②Varnish</b>	
Resin	
Solvent used	
Composition ratio of solvents (When two or more types are mixed)	%
Density [Density of solid (resin)]	%
Viscosity	C.P.
<b>③Property after finishing</b>	
Resin content (Based on the total weight of the product)	%
<b>④Operating conditions</b>	
Drying temperature	°C
Curing temperature	°C
Processing speed (Web speed)	m/min
Machine operating speed Max.m/min	
Max. allowable exhaust gas density (Multiple of lower explosion limit)
